

Walkable Ceiling MWC60

The high-grade aluminum grid ceiling system is suitable for a wide variety of cleanroom concepts. Standard grid dimensions allow a quick installation. MWC60 features the highest load bearing capacity, with a minimum of suspension points and a completely closed walkable surface. All ceiling panels can be interchanged. This ceiling can either consist of powder coated aluminum grid profiles or stainless steel grid profiles.

- Fully walkable ceiling for maintenance works
- GMP compliant
- Maximum distributed load 200 kg/m²
- Suspension distance up to 2.4 x 2.4 m
